Notes:

There were no edits made in the measured parameters used to calculate meteorological and navigational parameters.

Takeoff/Landing data: Data during landing and takeoff are potentially suspect. It is recommended that ground data not be used for scientific analysis.

This was a high altitude dropsonde survey lawnmower pattern mission (no low altitude penetraions)

TDM.2 (Edgetech) used as reference for dew point calculations. Novatel AltGPS.3 used as source of absolute altitude. All measured and calculated parameters performed normally during the science phase of flight.
